Content

Revision

The first version.

1 Applications

Mainly used for ultrasonic ranging, smoke detector, parking system, robot R&D, liquid level measurement and so on.

2 Features

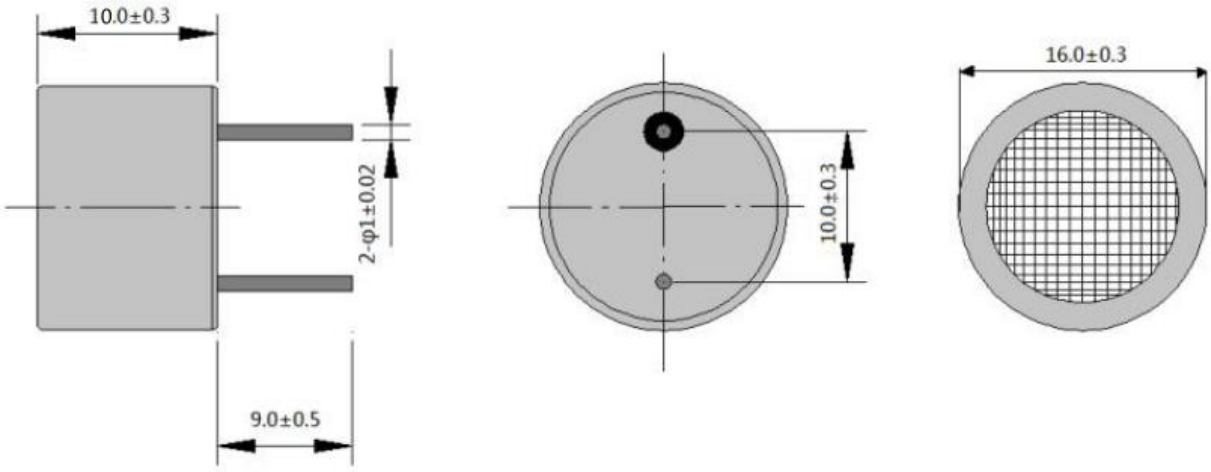
2.1 Dual Use:Transmitter/Receiver
2.2 Compact and light weight.
2.3 High sensitivity and sound pressure
2.4 Less power consumption
2.5 High reliability

3 Technical Specifications

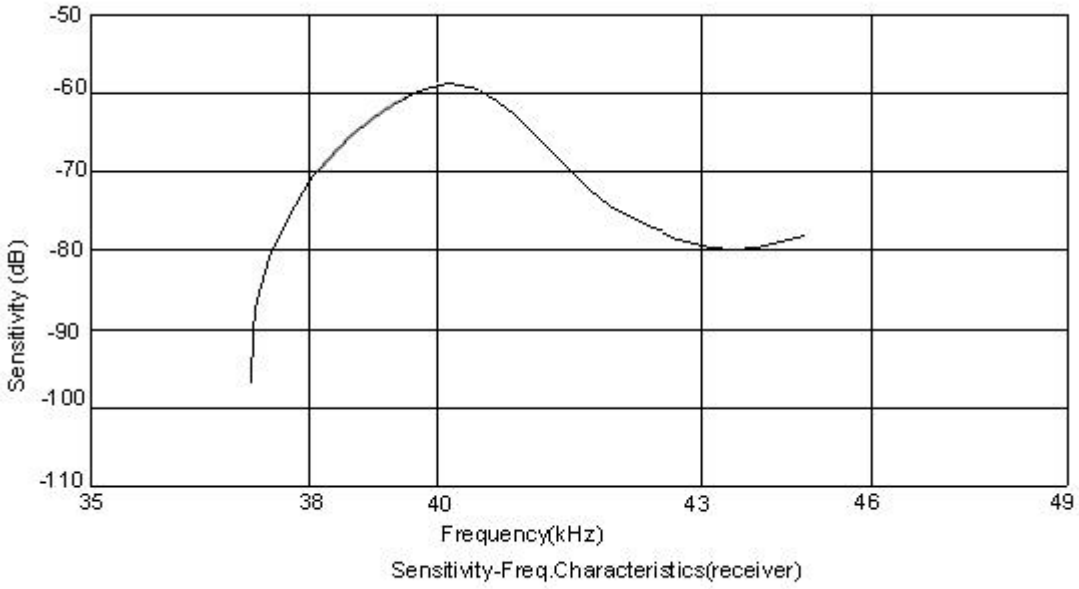
Item	Value
Using method	Transmitter/Receiver
Nominal Frequency	40±1.0KHZ
Sensitivity	≥-68V/u Mbar
S P L	≥115dB(10V/30cm/sine wave)
Directivity	80deg
Capacitance	2400pF±20%@1KHz
Detectable range	0.2~18m
Allowable input voltage	150Vp-p(40KHz)
Operating Temperature	-20~ +70℃
Response time for receiver	Max 1.6
Housing material	Aluminum
Weight	2.15g

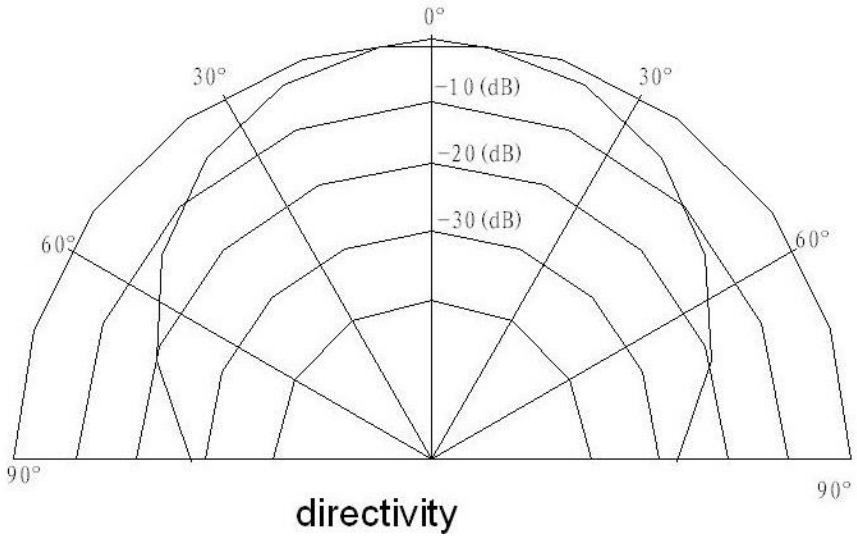
4 Mechanical Drawing

unit: mm



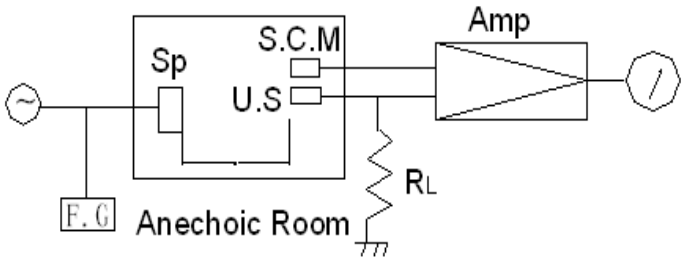
5 Beam Pattern





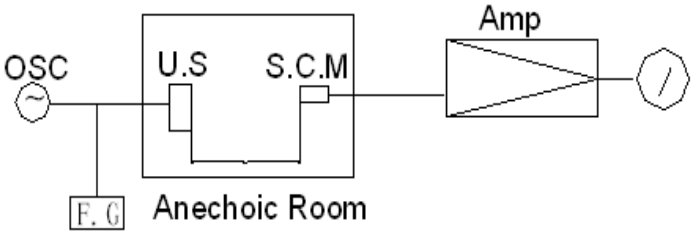
6 Test Circuit

Receiver



RL: 3.9KΩ
U.S :Ultrasonic Sensor
S.C.M:Standard Cappacitor Microphone
Amp. :Ampifier
OSC. :Oscillator
Sp :Tweeter
F.C :Frequency Counter

Transmitter



U.S :Ultrasonic Sensor
S.C.M:Standard Cappacitor Microphone
Amp. :Ampifier
Input voltage:10Vrms
F.C :Frequency Counter

7 Reliability Test

7.1 High Temp. Life Test	
Temperature	+85±3℃
Duration	100 hrs
7.2 Low Temp. Life Test	
Temperature	-40±3℃
Duration	100 hrs
7.3 Heat Cycle Test	
Temperature	+85±3℃ 1hour
	-40±3℃ 1hour
Cycles	10 cycles
7.4 Humidity Test	
Temperature	+60±2℃
Relative Humidity	90～95%
Duration	100 hrs
7.5 Vibration Test	
Vibration Frequency	10～55Hz
Sweep Period	1.5 min

Direction	x,y&z
Time	2 hours/direction
7.6 Shock Test	
Acceleration	sine 100G
Direction	x,y&z
Shock Time	3 times/direction
7.7 Drop Test	
Height	1 m on concrete floor
Times	2 times

7.8 Connector Soldering Check:

Immersing terminal up to 1mm below in soldering bath at 260℃ 10 Seconds.

Notice:

The variation of the S.P.L or the sensitivity at 40KHz is within 2dB compared with initial figures at 25℃ in 24 hours after above test conditions.

8 Caution in Use

8.1 Please avoid applying an excessive stress to the transducer because it might be damaged.

8.2 The transducer may generate surge voltage by mechanical or thermal shock. Care should be taken to protect from it in designing your application circuit.

8.3 Please do not apply DC voltage to the transducer.

8.4 Please do not use the transducer in water.

8.5 The piece of sensor may be damaged by force pressure from back of sensor.

8.6 Please well evaluate the painting and electrical characteristic for your coating.

8.7 When used to distinguish between positive and negative.

9 Note

9.1 please make sure that your product has been evaluated in view of your specifications with our product being mounted to your product.

9.2 You are requested not to use our product deviating from the agreed specifications.

9.3 We consider it not appropriate to include any terms and conditions with regard to the business transaction in the product specifications, drawings or other technical documents.
